**ANDEN** A77 Digital Dehumidifier Control for Indoor Cultivation and Grow Rooms

**Accurate Readings, Easy Interface**
Monitor and adjust the relative humidity of your indoor growth environment with the Anden A77 Digital Dehumidifier Control. This wall-mounted unit lets you dial in relative humidity levels to create a healthy, grow-optimized environment with constant monitoring and easy adjustments. This is a wired control that connects directly to your dehumidifier for accurate, reliable readings.

- Humidity Control - Optimize the performance of your Anden dehumidifier with this wall-mounted control
- One-Touch Buttons - The intuitive interface features on/off buttons, and up/down arrows for adjusting relative humidity
- Easy Readings - The display shows the relative humidity in bold for quick, easy readings
- Wired Control - This unit is wall-mounted and hardwired to your Anden dehumidifier for accurate, reliable control
- Built to Last - Dependability is at the heart of what we do. That's why we offer a 5-year warranty on this product--so you can grow with confidence

**Hardwired Controls**
This wall-mounted unit is hardwired to your Anden dehumidifier, giving you accurate readings and easy control without needing to directly access your dehumidifier.

**Digital Display**
The relative humidity level is displayed in bold on the digital screen for easy readings and quick adjustments.

**Energy Savings**
Accurate monitoring and precise controls can save you money on energy costs by activating your humidification systems only when they're needed. The control includes an on/off switch and up/down buttons.
