

Quest PowerDry 850D Pro

Desiccant Dehumidifier

The Quest PowerDry 850D Pro Desiccant provides the perfect blend of portability, versatility, and performance in a medium-capacity desiccant dehumidifier. It combines the wide operating range and ultra-low grains of the Quest PowerDry 1200D Pro with the portability of a refrigerant dehumidifier like our Quest PowerDry 4000 Pro. The included remote humidistat and process blower speed control allow you to tailor the drying to the task at hand. The 850D operates both vertically or horizontally and is perfect for low clearance applications, fitting inside most crawlspaces. The lower carrying handle makes moving the unit down stairs, as well as into and out of a crawlspace, a breeze.

The PowerDry 850D delivers 850 CFM of ultra-low grain process air and removes a stunning 370 pints per day at AHAM conditions. The true four-hole design* allows for positive, neutral, or negative pressurization of the affected area.

Power to the unit is provided by either a 30- or 50- amp, 230-volt grounded power cord (both are included). The reactivation air stream is ducted through 6" flex duct, which is also provided with the unit.

**Having completely separate process and regeneration airstreams.*

When to use:

- 850D is ideal for drying low evaporation materials such as concrete, brick, plaster, and hardwoods.
- 850D performs better in cooler temperatures (below 70°) than refrigerant dehumidifiers
- 850D desiccant is sized for 2 ACH (class 2) for up to 25,500 cu.ft and up to 3 ACH (class 3 & 4) on 17,000 cu.ft

How to use:

- Use Max Water when primarily drying the air
- Use Max Grains when tenting or drying low evaporation materials
- The unit can operate horizontally or vertically
- Duct the reactivation outlet (225 CFM) outside the affected area or into refrigerant dehumidifier(s) with +350 CFM inlet.

Quest PowerDry
850D Pro

ETL Listed

Features:

- 850 CFM of Process Air Flow
- Ultra Low Grains for Max Water Removal
- True Four Hole Desiccant
- Operates Vertically and Horizontally
- Runs on 240V 50A or 30A Connections
- Small Size and Weight
- Legendary Stainless Construction

Quest PowerDry 850D Pro

Desiccant Dehumidifier

PowerDry 850D Pro Specifications

Part Number	4034010	
Power	208-240VAC, 50/60Hz, Single Phase 30A or 50A branch circuit protection (24A or 40A actual amp draw)	
Water Removal	370 pints/day @ AHAM (80° F, 60%)	
Blower	850 CFM Process Airflow 225 CFM Reactivation Airflow	
Operating Range	-10° F to 120° F	
Filters	Process filter size: 20" x 20" x 2" Reactivation filter size: 9" x 11 3/8" x 1/4"	
Duct Connections	Process Inlet: 18" or 12" Flex-Duct (optional) Process Outlet: 10" Lay Flat collar (optional) Reactivation Inlet: 6" Flex-Duct (optional) Reactivation Outlet: 6" Flex-Duct (required)	
Warranty	One year Parts and Labor	
Dimensions:	Machine	Shipping
Width	20"	24"
Height	41"	47"
Depth	23.25"	26"
Weight	155 Lbs.	173 Lbs.
